

The 4AS to Exceptional Leadership

1 – Accept reality

- Identify your challenges and face them
- You cannot solve a problem you have not clearly defined.
- Measure your progress often.
- You only improve what you measure.

2 – Abandon obstacles

- If you don't forgive, it only hurts you.
- Identify your obstacles and select ideas to overcome them. ie. remove what is on your way
- Have a true north. what is your ethical compass that guides your success?

Are you
a great
LEADER?

4 – Adjust to better ways

- Identify what you must do and do it.
- Change small, but change often
- Focus on the future and embrace new ways of doing things.

3 – Appreciate people

- Do not move around trying to show people how big and important you are. move around trying to remind people how important they are.
- Empower people to help you
- Your work as a CEO/ Manager is to grow the best. Make it a point to meet new people daily. Don't lock yourself in the office.
- Establish systems and respect them.
